Ahmed Adas

Android & Mobile App Developer

Palestine | adass0301@gmail.com | +972 593 407 569
github.com/ahmadadass | t.me/ahmadA0301

PROFILE

Mobile development student with four years of hands-on Android practice using Java and Kotlin. Independently builds apps with local databases, authentication, APIs and offline functionality. Adaptable, patient and self-directed. Open to junior roles, internships and freelance opportunities.

TECHNICAL SKILLS

Core: Java, Kotlin, Android, SQLite, SQL, JavaScript, Node.js, REST APIs, Git/GitHub.
Additional experience: C++, Python, HTML/CSS, Firebase, Linux, algorithms and data structures.
Currently developing: Dart and Flutter.

SELECTED PROJECTS

Sooqy | Android accounting & inventory app

Built a mobile tool for small shops and market stalls in Gaza to track stock, customer balances, expiry dates and transaction history. Developed the Java/Kotlin app, SQLite storage and JavaScript/Node.js API for authentication and cloud synchronization. Completed, with limited use beyond personal testing; not yet published on an app store.

LAN Messenger | Direct local-network communication

Built Java clients for Android and Windows to exchange messages and files without internet access or a dedicated server. Used UDP for text messages, TCP for file transfer and SQLite for local data. Developed in response to local communication needs during displacement in Gaza in 2025.

Other completed projects

Bot Dashboard: web dashboard for a Telegram bot. FreelanceJobHub: independently built university project. Gaza Aid Data: a project for local community work.

EDUCATION

BSc, Smartphone Application Design & Programming

University College of Applied Sciences (UCAS)
2023 - expected 2028 | Third-year student | GPA: 87.5/100

ADDITIONAL BACKGROUND

Practical experience repairing phone and laptop circuit boards. Completed English level 8 and electronic circuit-board repair training. Participated in a UCAS hackathon.
